

How to make your physical therapy clinic more environmentally sustainable

Working with partners in sustainability: insurance companies, banks, electricity providers and others

Assessing your carbon emissions and potential to reduce them

Saving energy: electricity, water, heating

Sustainable work clothes, clinic and therapy equipment

Digitalization: Sustainable (use of) hardware, software, patient files and communication

Environmentally friendly transport: commutes, home visits, professional education, conferences

Being conscious around paper use

Reducing waste: saving, reusing and recycling
